

Omar N. Saab

Technical Leader and Full-Stack Engineer

Beirut-based technical leader focused on robust business-critical systems. I translate business requirements into maintainable platforms, make technical tradeoffs explicit, and lead delivery across frontend, backend, mobile, AI workflows, integrations, and production support.

120+

delivered projects across MENA industries

50k+

products handled in AI grocery ingestion

10+

sectors including finance, medical, logistics, retail

EXPERIENCE PROFILE

Product-focused full-stack delivery

Built responsive interfaces, dashboards, ecommerce flows, CMS-driven pages, operational tools, APIs, authentication flows, data models, and third-party integrations for production products.

Enterprise and regulated-sector execution

Delivered work across banks, hospitals, insurers, airports, public administrations, retailers, logistics providers, education institutions, fintech platforms, and ecommerce operators.

Technical leadership and architecture

Shape systems around business workflows, integration boundaries, data ownership, access control, maintainability, release planning, monitoring, and production support.

SELECTED PROJECTS

Masarak Platform - Logistics and port operations

Full-stack delivery and platform architecture for service access, operational workflows, and reliable business-critical port activity.

Fruugle App - AI commerce

Product engineering and data workflow design supporting 50k+ product ingestion, structured discovery, and commerce-oriented catalog handling.

ZER01NE - Software agency platform

Digital presence and delivery strategy for a service-focused agency experience communicating credibility, capabilities, and technical execution.

Riyadah App - Sports technology

Product concept and platform planning for clubs, athletes, participation workflows, and community discovery.

Memora Aligners - Healthcare product website

Healthcare product website focused on patient education, brand trust, and conversion paths for dental aligner customers and dentist audiences.

Shopico Admin Panel - Ecommerce operations

Admin workflows for products, categories, orders, users, wallet top-ups, coupons, branches, currencies, and store operations.

BROADER PORTFOLIO COVERAGE

â€ Bank Audi
â€ Banque Libano-Francaise
â€ Libano Suisse Insurance
â€ KIC Insurance
â€ LAU Medical Center
â€ Dallah Hospital and Health
â€ Erbil International Airport
â€ Middle East Airlines
â€ IQOS Lebanon
â€ Fintech Galaxy
â€ Finhub Bahrain
â€ Lebanese Petroleum Administration

CORE SKILLS

React	Next.js	Angular	Vue	TypeScript	JavaScript	React Native	Expo	Node.js
Express	NestJS	PHP	Laravel	REST APIs	GraphQL	OAuth/JWT	MySQL	PostgreSQL
MongoDB	Redis	Docker	Nginx	AWS	Azure	Google Cloud	CI/CD	AI integrations
Data ingestion	Prompt engineering	Workflow automation						

LEADERSHIP PRACTICES

- Architecture reviews, API boundaries, database boundaries, and scalability tradeoffs.
- Technical roadmaps, scope definition, sprint planning, QA/UAT planning, and release planning.
- Code review systems, implementation standards, documentation, and maintainability practices.
- Cloud/server decisions, CI/CD environments, monitoring, incident response, and production ownership.
- Stakeholder alignment, vendor evaluation, requirement mapping, and risk communication.

DOMAIN EXPERIENCE

Logistics	Port operations	AI commerce	Ecommerce	Admin dashboards	Fintech	Banking	
Insurance	Healthcare	Airports	Travel	Education	Government	Retail	Restaurants

CERTIFICATIONS

- AI for Data Analysis
- AI for Writing and Communicating
- Google AI
- AI Fundamentals
- AI for Research and Insights
- AI for App Building
- AI for Content Creation
- AI for Brainstorming and Planning

HOW I WORK

- Translate business requirements into maintainable systems.
- Make technical decisions clear enough for teams to execute.
- Design around data flows, integration boundaries, ownership, and operational reliability.
- Stay involved from implementation through launch support and production outcomes.
